PROFILE SUMMARY

Dynamic Software Engineer with a focus on Full-Stack Development and DevOps. Proven track record in building scalable web applications using React, Node.js, and Python. Expertise in Linux environments (3+ years) and Cloud Infrastructure, recently certified in Google Cloud & Generative AI. Experienced in QA automation with Selenium and deploying secure, high-performance applications.

TECHNICAL SKILLS

- Languages:** Python (Full Stack), Java, C, Bash Scripting (Linux expert)
- Frontend:** React.js, React Native, Flutter, Angular, JavaScript (ES6+), HTML5, CSS3
- Backend:** Node.js (REST APIs), Python (Django/Flask)
- Cloud & DevOps:** Google Cloud Platform (GCP), AWS, CI/CD Pipelines, Docker, Linux Administration
- Databases & Tools:** MongoDB, MySQL, Cloudinary, Postman, Selenium (QA Automation), Git
- AI/ML:** Generative AI Fundamentals, YOLO v8, DenseNet 121, Prompt Engineering

EDUCATION

JNTUA (University) B.Tech CSE	CGPA: 8.1	Nov 2021 – May 2025
TNC Junior college 12 th Standard	Percentage: 86.7%	June 2019 – July 2021
Ravindra Bharathi School 10 th Standard	CGPA: 9.5	June 2018 – July 2019

PROFESSIONAL EXPERIENCE

Full-Stack Developer Devloom Labs | Punjab, India Oct 2024 – Nov 2025 www.devloomlabs.in
eSports Tournament – [Winzone Arena](#)

- Secure Auth:** Built a Role-Based Access Control (RBAC) system using JWT and HttpOnly cookies to isolate User and Admin privileges.
- Tournament Engine:** Developed a multi-step registration flow in React with Node.js concurrency checks to prevent over-booking.
- Credential Security:** Automated the encrypted delivery of match IDs/passwords to verified players via scheduled Node-Cron tasks.
- Fintech Integration:** Integrated Razorpay for wallet top-ups, using Webhooks to ensure data consistency between payment and balance.
- Support System:** Architected a real-time Chat Support module using Socket.io for direct Admin-User communication and message persistence.

PROJECTS

Healthcare Orchestrator (Doctor Booking)

- Full-Stack:** Architected a Flutter (Patient) and Angular (Doctor) ecosystem powered by a Node.js/MongoDB backend.
- DevOps/Backend:** Engineered RBAC for HIPAA-level data isolation and built an asynchronous SMTP notification queue to ensure high system availability during traffic spikes.

FinTrack Analytics (Business Management)

- Full-Stack:** Developed a MERN dashboard featuring complex MongoDB Aggregation Pipelines for real-time P&L visualization and custom financial filtering.
- DevOps/Impact:** Automated data categorization logic, reducing manual bookkeeping by 40% and optimizing server-side processing speeds for large financial datasets.

Sentinel QA Suite (Automation & CI/CD)

- DevOps/SDET:** Engineered a Python/Selenium automation framework to integrate regression testing into the CI/CD pipeline.
- Impact:** Reduced manual testing cycles by 60% and implemented automated smoke testing to ensure high deployment reliability and zero-downtime releases.

CERTIFICATIONS & INTENSIVE TRAINING

Google Cloud Computing Foundations & Generative AI | *Google Cloud Skills Boost* ([verified](#))

- Completed a 3-month intensive program covering Cloud Infrastructure, Networking, and Security.
- Mastered foundational Generative AI concepts and data-driven AI tasks within the Google Cloud ecosystem.
- Hands-on experience with 8 specialized tracks including Data, ML, and AI in Google Cloud.

Certified Ethical Hacking (v12) | *Learnkarts* ([verified](#))

- Successfully completed a 4-course specialization covering Ethical Hacking Fundamentals and System/Network Security.
- Gained practical experience in vulnerability assessment, penetration testing, threat detection, and incident response.
- Demonstrated proficiency in defending against sophisticated cyber-attacks through real-world scenarios.

Developing Front-End Apps with React | *IBM* ([verified](#))

- Developed interactive user interfaces using React, JSX, and ES6.
- Mastered core React concepts including props, state, hooks, forms, and Redux for state management.
- Built dynamic front-end applications with a focus on reusable components and event-driven programming.

Selenium Automation and Testing Frameworks | *Packt* ([verified](#))

- Designed robust automation frameworks using the Page Object Model (POM).
- Developed data-driven tests and integrated cross-browser/headless testing techniques.
- Scaled automation suites using Selenium Grid for standalone server environments.

ACHIEVEMENTS

- **Algorithmic Excellence:** Solved 300+ challenges on LeetCode and HackerRank, demonstrating advanced proficiency in Data Structures and Algorithms.
- **Full-Stack Impact:** Deployed 3+ production-grade apps, including an eSports platform with an automated wallet and reward system.
- **Automation Efficiency:** Reduced manual testing time by 60% by engineering a Selenium (POM) automation suite.
- **Security & Compliance:** Mitigated vulnerabilities as a Certified Ethical Hacker (v12), ensuring 100% secure coding standards.
- **Cloud & AI Integration:** Optimized infrastructure and scalability using Google Cloud and implemented Generative AI prompt-engineered solutions.
- **Financial Integration:** Integrated Razorpay API for secure, real-time transactions and automated financial reconciliation.

INTERESTS & ACTIVITIES

- **Competitive Programming:** Consistently practicing DSA to maintain high problem-solving speed.
- **Open Source:** Exploring modular code architecture and contributing to GitHub repositories.
- **Cybersecurity Research:** Participating in CTF (Capture The Flag) challenges to stay updated on threat mitigation.
- **Tech Mentoring:** Documenting Linux and Full-Stack tutorials to support the developer community.

LANGUAGES

- **English:** Professional Working Proficiency.
- **Telugu:** Native.
- **Hindi:** Professional Working Proficiency.

CORE STRENGTHS

- **Rapid Upskilling:** Proven ability to master complex tools (like Google Cloud & Generative AI) in short timeframes.
- **Cross-Functional Teamwork:** Experienced in Agile environments, bridging the gap between Backend, DevOps, and QA.
- **Technical Troubleshooting:** Expertise in debugging across the full stack and Linux environments.
